

Surveyor No. _____

Date of issue 6 September 2026

Survey Request

Subject: observational survey of the area around the wall

The observational survey set out below is hereby requested.

1. Subject of the survey

Wall surface recovered at site ██████

Control No.: SH-KB-02

2. Details of the subject

Not disclosed to the surveyor.

3. Method

Wear the observation device and proceed along the designated route while watching the images shown.

The images switch automatically according to the surveyor's position.

During observation, an agent assists the surveyor through the device.

Follow any instruction given.

4. Records

Whenever an anomaly is found in the images, hold down the button in your hand.

The agent analyses it, and if an anomaly is detected the device attempts to remove it.

The observation device

This device exists to observe phenomena that cannot ordinarily be perceived.

Do not remove the device during observation, except to discontinue the survey.

I have read and understood the above.

Surveyor's signature _____

This document is collected at the end of the survey.

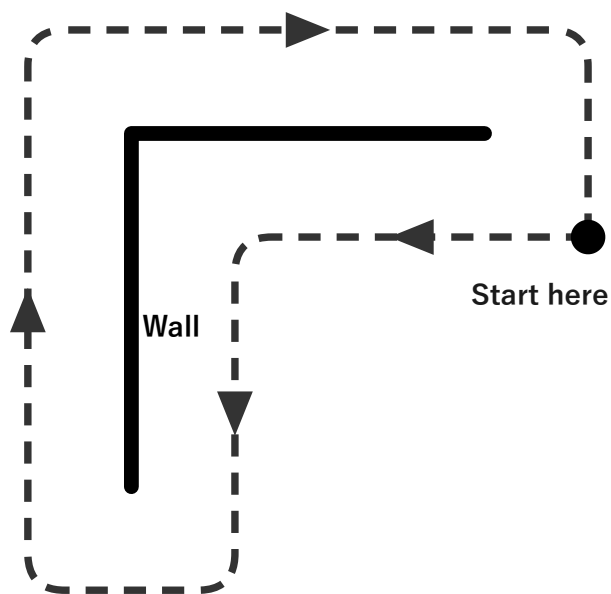

廻り視

Before you begin

This work contains horror imagery and scenes meant to unsettle or frighten.

If you feel unwell at any point, stop where you are, remove the headset and let a member of staff know.

Route

You walk around the wall three times, in the direction of the arrows.

Follow the handrail with your right hand as you go. Do not let go of it.

What you see on the screen is not the view from where you are standing.

Your feet are hard to see. Walk slowly, very slowly, and with care.
